COMPARLUX – who we are

We are manufacturer and trader of lighting products – an expert in all fields concerning interior and exterior lighting technology

COMPARLUX – what we do

Comparlux offers a wide range of lighting systems as well as components and parts. The product range includes spotlights, power-track-systems, downlights, ceiling and surface mounted light fixtures, floodlights and recessed light fixtures as well as LED-technology - indoor and outdoor.

COMPARLUX – functions

Production

Thanks to own manufacturing and assembling we can control and deliver high quality products. We also produce exclusively parts or light fixtures according to customer requirements.

Trade

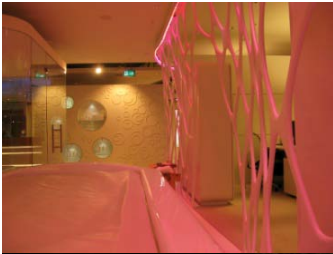

To complete our product range and offer all products required to fulfill every project, we cooperate with suppliers the same high standard all over the world.

Development

Competitive advantages are a result from our own developments, especially successful on the field of LED technology. We introduced innovations which are already established on the market.

COMPARLUX – what we are known for

Fast delivery

A good logistic system and a huge warehouse guarantee short delivery terms.

Quality

Comparlux provides high quality standard. High-class materials, electrical components of well-known European manufacturers, modern production technologies as well as standardized processes ensure safe and durable products.

Flexibility

Special requests like modified and customized products can be satisfied in most cases. The lighting systems are close to the trends of the industry, e.g. LED technology.
